Explanation

- Sample #1371
- PCBs in soil below the site-specific remediation goal of 23 milligrams per kilogram (mg/kg)
- 2015 soil sample not analyzed
- Pre 2015 soil sample
- Excavated soil sample
- Soil removal area
- PCB soil excavation area
- Approximate location of below grade structure, pipe, or footing with the structure number designation
- Former building pad
- Sample index grid and reference number

- Notes:
- All locations are approximate.
 - PCB concentrations in milligrams per kilogram (mg/kg).
 - Sample index grid and reference numbers are provided as a means of locating samples listed in the data tables. The grid system excludes stockpile samples.
 - Sample reference elevation for pre 2015 soil samples is 187 feet MSL for Phase IIB. Native grade elevation for the Phase IIB Area is set at 183 feet MSL relative to the eastern parking lot using the North American Vertical Datum 88 (NAVD88). Soil sample reference elevation for 2015 soil samples is 186 feet MSL.
 - Soil removal areas are considered the limits of the work area rather than the limits of the soil excavation. Soil excavation areas are shown as a solid black line.

Basemap modified from Pechiney Cast Plate, Inc. Site Plan dated January 9, 2002; Aluminum Company of America "Works General-MPA" figure dated October 10, 1984; Los Angeles County Assessor's Office Parcel Map 6310/Sheet 8 dated November 5, 1958; surveys conducted May 31, 2006 and June 6, 2006 by CalVada Surveyors; and surveys conducted October 12, 2011 and September 10, 2013 by Dulin & Boynton.

SOIL REMOVAL AREA AND SAMPLE LOCATIONS AROUND SAMPLE #1371 EAST OF 4a/4b EXCAVATION RAMP IN PHASE IIB
Former Pechiney Cast Plate, Inc. Facility
3200 Fruitland Avenue
Vernon, California
